PROFESSIONAL SUMMARY

MSc Cloud Computing graduate with hands-on experience designing, building, debugging, and deploying backend and cloud-native applications using Python. Experienced in developing scalable systems, troubleshooting complex technical issues, optimizing application performance, and using AI-assisted engineering tools throughout software development. Strong foundation in software engineering, cloud platforms, REST APIs, security, and DevOps.

CERTIFICATIONS

AWS Certified Cloud Practitioner | AWS Application Networking Demonstrated | AWS Serverless Demonstrated | AWS Incident Response Demonstrated | Linux Essentials (Cisco) | GitHub Foundations | Docker Foundations | Microsoft Azure Fundamentals.

SKILLS

Languages: Python, Bash, SQL | **AWS & Cloud:** Boto3, Lambda, API Gateway, DynamoDB, S3, EC2, CloudWatch, SQS/SNS, CloudFront | **Backend:** REST APIs, Flask, Django | **DevOps:** Git, GitHub Actions, Docker, CI/CD, AWS CLI | **Systems:** Linux, TCP/IP, DNS, HTTP/HTTPS | **ServiceNow:** Studio, Flow Designer, Integration Hub.

EXPERIENCE

RiseUp with ServiceNow Professionals Program, RiseUp Participant, Dublin Aug 2026 - Present

- Selected for the 14-week RiseUp with ServiceNow technical training program, participating in instructor-led training, on-demand learning, and hands-on practical exercises focused on ServiceNow and IT Service Management.
- Developing hands-on experience with ServiceNow Studio, Flow Designer, Integration Hub, Business Rules, Client Scripts, UI Policies, and UI Actions.
- Building knowledge of enterprise workflows, integrations, platform configuration, and ITSM through instructor-led training and practical exercises.

Python Developer Intern, Innovation Info Pvt Ltd, Hyderabad, India May 2024 – Oct 2024

- Developed Python backend utilities to automate internal workflows, improve operational efficiency, and reduce repetitive manual tasks.
- Debugged Linux-based applications by analyzing logs, reproducing failures, performing root cause analysis, and implementing reliable fixes.
- Investigated REST API and backend integration issues while using Git workflows to test, maintain, and deploy application changes.

ENGINEERING PROJECTS

PixelGo - Peer-to-Peer File Transfer Platform | Founder | [Live Link](#) | [GitHub](#) Aug 2026 - Present

- Architected and built a browser-based P2P file-transfer platform enabling direct device-to-device communication without server-side file storage, using AI-assisted development.
- Implemented client-side AES-256-GCM encryption and secure session handling for protected file transmission.
- Designed real-time peer communication using QR-based session establishment, chunked data transfer, and network traversal.
- Used AI tools for coding, debugging, technical exploration, and documentation, independently validating solutions through testing before production deployment via GitHub and Cloudflare Pages.

Serverless Function Delivery Network – AWS

Sep 2025 – Jan 2026

- Designed and developed a serverless backend using Python, AWS Lambda, API Gateway, DynamoDB, and EC2 for scalable request processing.
- Investigated application performance using CloudWatch logs, execution metrics, and performance testing to identify bottlenecks and optimize request handling.
- Implemented multi-level LRU and DynamoDB caching, reducing repeated-request latency by over 95% while improving application efficiency and scalability.

EDUCATION

MSc Cloud Computing | National College of Ireland, Dublin

Jan 2025 – Apr 2026

B. Tech in ECE | Godavari Institute of Engineering & Technology, India

Jun 2020 – Apr 2024
